ward movement. Canadian Pacine surfered from the report of a new issue of
capital.

Notwithstanding these draw backs, the
upward movement of prices gat vered monentum and volume as the day proceeded,
and was effective in alarming a more
important snort interest than fixs yet
been reached since the turn from the extreme, depression of the market. The
causes of the advance were rather obscure, but vague assertions were freely
circulated of a large and determined alsorption of stocks by the various groups
of great capitalists and banks, which
make up the dominant powers in the
financial world.

Call money loaned again as high as
7 1-2 per cent. The decrease in value of
imports at New York for November of
tavorable tendency of our foreign trade
in its bearing on the money situation.
The government's estimate on cotton, in
the reduced amount of this crop indicated,
is scarcely capable of so favorable an interpretation, but the prevailing mood of
the Stock Exchange was buillish, and all
contrary influences were ignored.

Bonds were irregular. Total sales, par
value, were \$450,000.

United States bonds were unchanged on
the last call.

Total sales of stocks to-day were 340,900

ESTIMATE MADE OF COTTON CROP

The Statistician Computes It at Nearly Ten Million

(By Associated Press.)
WASHINGTON, Dec. 3.—Preliminary
returns to the chief of the Bureau of
Statistics of the Department of Agriculture indicate that the actual growth of cotton in the United States in the year 1903-1904 will amount to 9,962,069 bales of

cotton in the United States in the year 1003-1904 will amount to 9,625,029 bales of an average net weight of 490.8.

The area picked, or to be picked, is estimated at 23,014,800 acres, a reduction of 525,405 acres, or 3.00 per cent, from the areage planted.

The total production of lint cotton is estimated at 4,889,700,297 pounds, an average of 1744 pounds per acre. The estimated production by States in pounds of lint cotton per acre is as follows:

Virginia, 189; North Carolina, 210; South Carolina, 182; Georgia, 183; Florida, 142; Alabama, 181; Alississippl, 211; Louislana, 223; Texas, 143; Arkmass, 196; Tennessee, 200; Missouri, 232; Okiahoma, 233; Indian Territory, 23i.

In addition to the report of its regular correspondents the bureau has had the benefit of an investigation of the effect of the boil weevil upon the cotton crop of Texas for 1903, conducted under the direction or the chief of the entomology. The results of this investigation have been given due weight in the present report, and the details will be published later by the division of entomology.

Through the courtesy of the officials of the census agents as to the amount of cotton remaining unginned. These estimates were turned over to the department too late, however, to receive full consideration, and they were, therefore, not used in making the present estimate.

Across the Pacific.

A remarkable story of the flight of a carrier pigeon comes from Salt Lake City. A pigeon recently fell exhausted on the steps of a house there, and on its legs was a tiny band bearing the inscription. "J. H. K., Jr., H. M. S. Alliance." The Alliance is now on the Asiastic station, and as the bird was caked with salt it is supposed to have flown across the Pacific.
